Communication Solutions for a Wireless World...

### ACCESS 3000 COMPACT PLUS

To enable communication quickly with people who are frequently on the move, and not always near a phone or computer, the ideal solution is paging. It is a technology that has proven powerful, versatile and highly cost effective.

Access 3000 Compact Plus is a desktop paging system that is simple and easy to use, yet with its powerful expansion options, it can be enhanced to become a fully integrated wireless messaging solution, adding a totally new dimension to the way you communicate.

#### As a Complete Desktop Solution

As a complete desktop paging solution Access 3000 Compact Plus is designed for fast, accurate paging and with its unique set of features, delivers performance you can rely on time and time again:

- User-friendly message prompts - guides you through the process of making a paging call or system administrative functions; making it easy to use, configure and install
- Fully integrated alphanumeric keyboard - allows you to send text, numeric or tone only messages to a single user or to your whole team; maximising responses
- Automatic call validation with message dispatch confirmation - page with confidence
- Easy to select pre-programmed messages - create a list of up to 100 frequently sent messages, saving valuable time
- Speech messages - adds weight and importance to a paging call for that urgent or unique message
- Telephone coupling - connects to your PABX for voice prompted telephone to pager messaging across a complete site
- Contact switch fitted to an alarm, fire security system or front door for fully automated paging. Calling a nominated user or team with a pre-fixed message; guarantees the precise response.

### ACCESS 3000 COMPACT - A CORPORATE WIRELESS MESSAGING SOLUTION

The true power of Access 3000 Compact Plus lies in its ability to expand, making it more than just a paging system. So whenever you are ready to expand, so too is Access 3000 Compact Plus. New modules can simply be added onto the serial port or the system bus - a local area network that can extend the capabilities of Access 3000 Compact Plus right across your organisation.

#### Fast, Effective Messaging from the Desktop

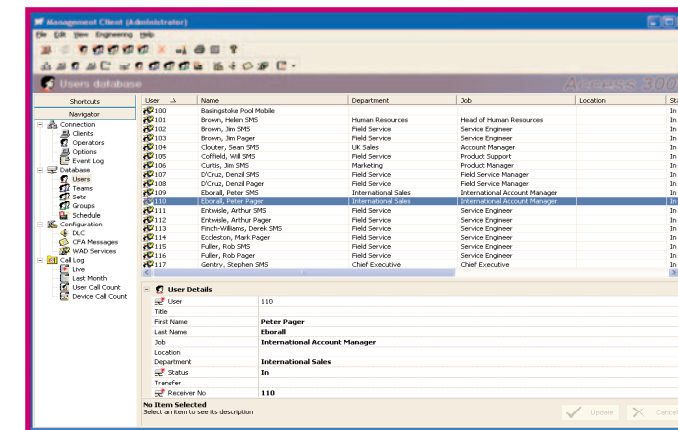

Access 3000 Compact Plus enables anyone across your computer network to text or page, by using Multitone's Access 3000 Server, an exciting new software package from Multitone with its easy to use PC or Web based paging capability, bringing the wireless revolution to the desktop.

#### Contacts to read Up-grade from 5 to 192 Automated Paging Contacts

Access 3000 Compact Plus can be easily upgraded from 5 to 192 closing contacts this gives you endless options for automated messaging, be it security, machine or alarm monitoring.

#### Machine Monitoring & Mobile Telemetry

Safety at work is a key concern. Equipment that may be prone to malfunction or overheating requires constant monitoring. Linking your paging system to multiple computer based control, monitor and alarm systems, allows key personnel to receive timely and appropriate alerts, enabling them to act quickly and efficiently to emergency's.

#### Complete System Management

Using Access 3000 Server or Multitone's dedicated Management Terminal, provides complete on-screen management of Access 3000 Compact Plus. Its sophisticated call logging facility keeps records of all paging calls so you can check complete call details, giving total peace of mind.
