ADVER-COASTER PAGING SYSTEM

Over 80,000 Boomerang Pagers are now in use everyday in Restaurants, Bars, Hospitals, Hotels, Resorts & more...

With Boomerang Pagers you'll easily manage your guest flow and create a quieter, more inviting atmosphere. Boomerang Pagers help you to be more profitable, by eliminating the high cost of labor associated with staff to search for customers.

GUARANTEED

TO BEAT ANY WRITTEN COMPETITORS QUOTE BY 10% ON A SIMILAR PRODUCT

IP54

DUST AND SPLASH PROOF PROTECTION PROVIDED. TESTED TO OVER 10,000 IMPACT DROPS & STILL OPERATES AS NORMAL

“Arguably the lowest replacement cost Pager on the market today.”

BOOMERANG ADVER-COASTER PAGING SYSTEM

Designed with 4 pins for increased stability on the charging base and bright white LED lights for when the alert is triggered, the Adver-Coaster offers features far beyond the traditional coaster pager.

Over The Air (OTA) commands will allow customers to select alert time and volume and the out of range mode will alert patrons should they travel too far from the transmitter.

These, along with a host of other features make the Adver-Coaster the pager you should choose when you are looking for a coast style pager.

OPTIONAL RFID TRACKING SYSTEM

Coming soon with the Boomerang Adver-coaster Pager is an optional RFID location function, allowing the flexibility of paging a patron OR locating their whereabouts on a graphical table plan all from the one device!

FLEXIBLE PROGRAMMING

Boomerang pagers are programmable between 450-470Mhz, making them perfect for a reseller with dealers in many regions. Why carry 4 models of the same pager when one pager is all you need?
