

CH78 DECT HANDSET FOR MULTITONE WIRELESS SERVERS

Product Overview

Being user friendly and easy to operate is a key factor when using wireless handsets. Without it the handset fails to live up to its main purpose of being a valuable tool for the employee to “manage on the move”.

The addition of the CH78 to the existing range of DECT handsets for Multitone’s wireless servers, adds a new and exciting mobile telephone to the range.

Colour display

With a large colour display and the intuitive user interface you are sure to make the CH78 DECT handset a preferred choice in administrative working environments.

Appearances may be deceiving, as the CH78, with its elegant design and light weight may look fragile, but in reality it is robust and designed for business use and being slim and light it can be dropped into a pocket for safety.

Meeting Customer Demands

Extensive user studies have been carried out in order to meet the needs of the mobile employee, and these have resulted in the CH78 boasting a long list of valuable features, including:

- **Intuitive user interface (UI)** makes the handset easy to use even while “managing on the move” as it has both text prompts and icons that make it easy to navigate.
- **A Vibrating alert** can be used in noisy environments, or with **Silent mode** if you are waiting for an important call in a meeting or where the ringing would be a disturbance. If you miss any calls then there is a 40 number **missed call** list that is easily accessible from the handset menu key.
- **A large colour screen** and a “Navigation wheel” make it easy to navigate through the feature menus and quickly select the option you need.
- If you need to work in an environment where the use of both hands is essential then you have the optional choice of a **light weight headset** or turn on the **loudspeaker** for hands free operation.
- For mobile users with many business contacts an optional charger can be used which allows the user to programme up to **250 name entries with 4 numbers for each entry**
- There is a choice of **belt clips when the handset is not in use**

The intuitive UI includes a text based menu as well as distinctive and large icons. The CH78 is positioned towards administrative environments across various vertical markets.

- Easy to use phone book (find and enter name numbers)
- Hands-free / headset / Silent / Call register w. time stamp
- Easy to recognise ring tone (internal vs. external)

Handset Applications
